

Top ways ReportsNow™ can improve your business:

	Current Way	REPORTSNOW™
<p><b>Report writing cycle</b>            The JDE Report Writing cycle is at least 1 week to account for package builds and deployments. This can cripple your ability to produce needed reports on-time.</p>	1 week	1 hour 
<p><b>Report request fulfillment</b>            How many report requests do you fulfill vs. reject? When a report is rejected, the work has to be done nonetheless. The workarounds can cost a lot more than if you have a good ad hoc reporting solution.</p>	20%	80% 
<p><b>Workforce utilization</b>            How many can write reports in your organization? With ReportsNow, you better utilize your workforce by allowing more business analysts to self-serve their reporting needs.</p>	IT only	IT, Business Analysts, Customer Support, C-Level 
<p><b>Time to add new modules for reporting</b>            With other third party reporting, it's an engineering effort to add new modules – field mapping, data formatting, security, etc.. With ReportsNow, adding new modules is instant.</p>	Weeks	Instant 

---

<b>Bottom line</b>	<b>Costly</b>	<b>High Savings and Efficiency</b>
